DEAR COLLEAGUES ;

Cosmetic - Aesthetic Gynecology is a new trendy area of aesthetic procedures. It grew up much in last decade but especially in last five years. Although it is very new as an application area, but the non-surgical procedures that are mentioned here, are not new for the other part of the body. In fact that, these procedures which are present for over 30 years and are used for many parts of the body was newly begun to use for genital area.

However, the cosmetic-aesthetic procedures in genital area have not only the results of changing the external appearance but also the functional results that effect the sexual life and can change the life quality of the aging women. Genital procedures are important especially for their functional effects. If we perform these procedures in a true way, we can support the life comfort of the women but if they are not performed in a true way we can easily injure the body by anyway. So, this is why we named this area "Functional Aesthetic Gynecology". In near future, the criterias that will determine the value of this kind of courses, will be more qualitative than quantitative.

We need to separate Functional Aesthetic Gynecologic procedures into two parts; Level-1 for Non-Surgical and Level-2 for Surgical. Because, nowadays, the both part include many subtopics and need more time to learn. So this is why we organised this course only for Level-1 Non-Surgical Procedures of Functional Aesthetic Gynecology. We aim to teach every details of every procedures to every participants in the course. We want the participants not only see the every procedure but also can do them alone in future.

The course will be together with International Uro-Gynecology Association (IUGA) Exchange Meeting Istanbul 01-02 Nov.2019 which is collaborated with Turkish Urogynecology and Pelvic Reconstructive Surgery Association (TUPRA/TJUD). As a big advantage, course participants will have the chance of free pass to whole congress.

We kindly invite the colleagues to join this course and learn the latest most popular treatments and techniques in Non-Surgical Functional Aesthetic Gynecology. It will be our pleasure to host you in our beautiful city of Istanbul.

Your Sincerely,

Ozgur Leylek MD ObGyn
Course Director
